Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7, 9-13, 15, 17-29, 31, and 34-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. As before, the original disclosure doesn't provide any indication as to whether it is number-average or weight-average molecular weight that is being recited. Applicant is reminded of previous discussions where the Examiner had outlined a possible ways of resolving this matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 30 is rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al., U.S. Patent # 5,416,151. The Examiner had previously held that these claims were allowable over the prior art. However, it is now appreciated that, whereas claim 3 states that the additive composition is added in an amount corresponding to 0.01-2.8 wt.% relative to the weight of the composition, claim 30, by contrast, recites a range of 0.01 to

10 wt.%. Clearly, the examples outlined in Table 1 adhere to this limitation. (Applicant is reminded that the Examiner had earlier acknowledged that the oil in most of these examples was paraffin oil but that an oil consistent with Applicant's description of a saturated hydrocarbon had also been mentioned in the broader disclosure and the skilled artisan would have readily appreciated that the paraffin could have been replaced with any of the oils described by the broader disclosure.

Allowable Subject Matter

Claims 32 and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
